

NeoTracker

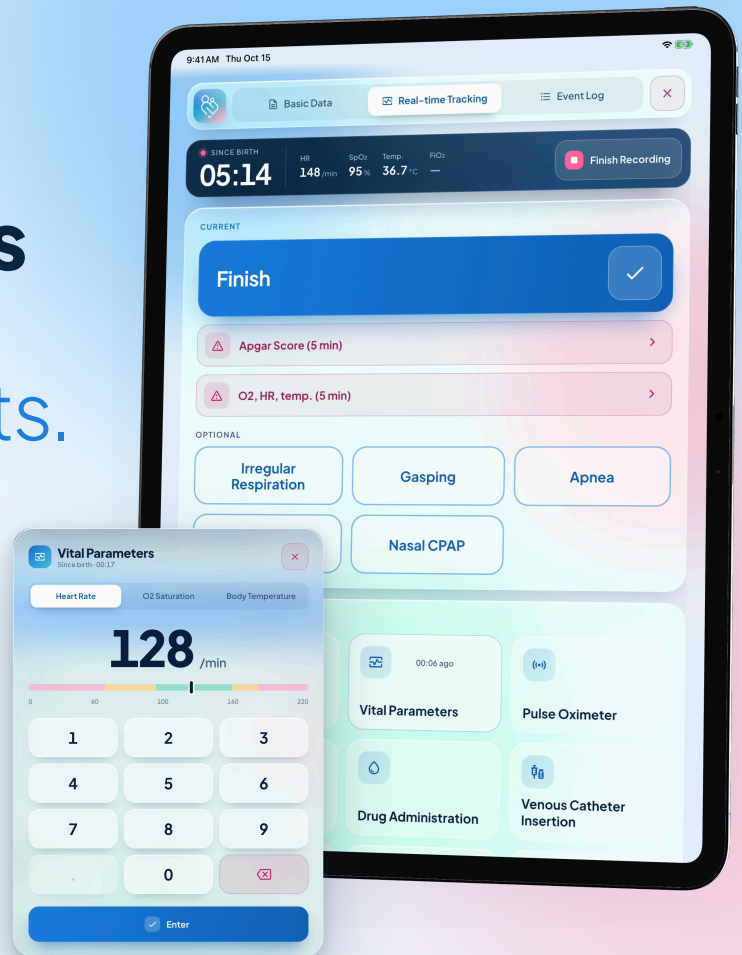

Delivery Room Event Log

Built by  **Genontech**
Digital Health Solutions

In the first minutes after birth, every action counts.

NeoTracker records newborn care in the delivery room as it happens. The clock starts at birth, every step is timestamped, and the team logs by touch or by voice, even with gloves on.

With NeoTracker, you keep events under control and have every piece of information at hand.

WHAT'S ON BOARD

Guided steps

The current step on top, optional interventions beside it.

Hands-free voice

Say a button's name to log it. Works offline, no network needed.

Vitals in seconds

HR, SpO₂, temperature, FiO₂, PEEP and PiP on one big keypad.

Apgar & 5-minute reminders

Due checks are flagged on screen, so nothing slips.

Structured basic data

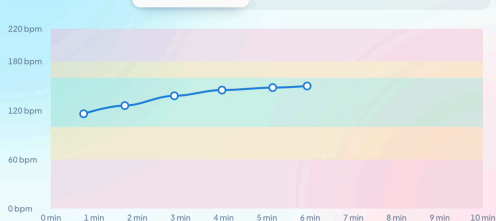

Gestational age, risk factors, prophylaxis, birth type, care team.

Review & export

A timeline and charts for every case, as a PDF report or data.

Visualisation

Heart rate over the first minutes

Apgar Score (5 min)

Appearance (Skin Color)

Blue / Pale

Pink Body, Blue Ext.

Pink

Apgar score in a few taps
